Based in Tokyo, Japan (JST, UTC+9)

From January 2027 · Senior or Staff roles, full-time, or advisory work

SUMMARY

For 8 years in Tokyo I have designed and run the distributed systems behind card payments, freight dispatch and a marketplace with 9 million monthly users.

Lately the work is platforms and reliability: golden paths that cut deploy lead time from 45 to 7 minutes across 14 teams, and a resilience program that took checkout to 99.99% availability.

The other half is rendering performance: a fleet map that holds 40k moving vehicles at 9 ms p95, and the film on this site, rendered by the site's own engine.

FOUR DATED RESULTS

38 → 9 ms
Map renderer p95 frame time (40k vehicles)
2021

×12
Dispatch throughput
2022–23

45 → 7 min
Deploy lead time (median)
2023-Q3 → 2024-Q4

44 → 9 min
MTTR (median, all incidents)
2024 → 2026

EXPERIENCE

Hanamichi Payments — A card-payments startup in Tokyo — Apr 2018–Mar 2020

Apr 2018–Mar 2020	**Backend Engineer** — Settlement API, card tokenization, the ledger rewrite
2018	Built the settlement API in Go; joined on-call in month four. First production service. Wrote the team's first runbook.
2019	Card tokenization and the ledger rewrite. PCI DSS scope 23 → 3 services (audit passed first time). Settlement batch 6 h → 50 min.

Wataridori Logistics — A remote-first logistics SaaS company — Apr 2020–Jun 2023

Apr 2020–Mar 2021	**Software Engineer** — Dispatch API, tracing across 140 services
Apr 2021–Dec 2021	**Senior Software Engineer (promoted April 2021)** — WebGL fleet-map renderer; open-sourced kento
Jan 2022–Jun 2023	**Tech Lead (6 engineers)** — Moving dispatch to events (14 months, zero downtime)
2020	A remote-first dispatch platform in a fog year (traffic ×6). Tracing across 140 services. MTTD 38 → 6 min.
2021	Promoted; built the WebGL fleet-map renderer. p95 frame 38 → 9 ms at 40k vehicles. Open-sourced kento.
2022	Carried dispatch from a monolith to events (strangler fig). 14 months, zero downtime. Throughput ×12.

Kairo — A C2C marketplace with ≈ 9 million monthly users — Jul 2023–present

Jul 2023–present	**Senior Software Engineer, Developer Platform** — Golden paths; incident-commander rotation lead since November 2024; platform reliability lead since October 2025
2023	Golden paths bridging 14 teams. Deploy lead time 45 → 7 min. 120 services onboarded by December 2024.
2024–25	A 47-minute regional outage (November 12, 2024), then the resilience program. RTO 4 h → 15 min. Availability 99.95 → 99.99%.

SELECTED WORK

Settlement ledger rewrite 2019
6 h → 50 min; zero double settlements since.

WebGL fleet-map renderer 2021
p95 frame 38 → 9 ms at 40k vehicles.

Developer platform: golden paths 2023–24
Lead time 45 → 7 min; 120 services onboarded.

Tracing across 140 services 2020
MTTD 38 → 6 min.

Dispatch: a strangler-fig migration to events 2022–23
14 months, zero downtime, throughput ×12.

Multi-region resilience program 2025
RTO 4 h → 15 min; availability 99.95 → 99.99%.

SKILLS

Web platform and graphics	TypeScript 7, React 6, Web performance 6, three.js / WebGL 5, Accessibility 4, WebGPU 1
Back end and distributed systems	Go 8, gRPC 6, Node.js 5, Kafka 5, Rust 3
Data	PostgreSQL 8, Redis 7, ClickHouse 3
Infrastructure and reliability	AWS (multi-region) 8, Kubernetes 6, Terraform 6, OpenTelemetry 6, Prometheus 6, SLOs and error budgets 5, Envoy 4
Practice and leadership	Technical writing 8, Mentoring 7, System design and RFCs 6, Incident command 3

MORE NUMBERS

6 h → 50 min Settlement batch time 2019

38 → 6 min Mean time to detect (MTTD) 2020

99.95 → 99.99% Checkout availability (annual) 2024 → 2025

31 → 4 pages Pages per on-call week 2024-Q4 → 2025-Q4

0 → 38 RFCs RFCs since founding the process 2023-10 → 2026-10

23 → 3 services PCI DSS scope 2019

0 → 120 services Services on golden paths 2023–24

4 h → 15 min Regional failover RTO 2025

11 / 4 Engineers mentored / promoted 2019–2026

OPEN SOURCE AND WRITING

kento — Idempotent job registration for Go

baren — An even-pressure load generator

scrubkit — A frame-accurate scroll-to-media-time controller. It runs the film on this site.

Strangler figs at dispatch scale — A Tokyo Go meetup, 2022-10

Golden paths without golden handcuffs — A platform-engineering meetup in Tokyo, 2024-06

Four nines, measured — An SRE community conference in Tokyo, 2025-11

PEOPLE

Weekly pairing, kept up for 3 years

Wrote the onboarding guide and still maintain it

Trained 9 incident commanders through shadow shifts

LANGUAGES

Japanese: native

English: professional (3 years in an English-speaking remote team)

Mandarin Chinese: HSK 5, business reading and conversation

EDUCATION

B.Eng. in Information Science, 2018 (a national university in Japan)
